MEMORANDUM

To : Fujitsu Components Touch Panel Customers
Cc : FCEU Touch Panel Staff and Sales teams
From : Steve Roylance – European Marketing Manager – Input Devices
Date : Monday, 29 April 2002
Subject: Touch panel drivers – Auto selection of OS and PnP and Non PnP drivers.

Dear Customer,

Please note that we have been reviewing the installation method for the drivers for our 55X based touch panel range and we have found that an automatic OS selection is more popular than individual file libraries. Although the file system and total space is bigger, the installation now can automatically detect the OS and it can allow the installer to choose between PnP and Non PnP operation.

Basic Driver information and Rev levels

	DOS	Windows 3.XX	Windows 95	Windows 98	Windows Me	Windows NT 4.0	Windows 2000	Windows XP
N16B-0558-B230 / B240								
Switch set to Non PnP	Rev 13L00	Rev 40L00	Rev 10L10 Combined revision, selectable PnP and Non PnP on installation					
Switch set to PnP	Rev 13L00	Rev 40L00						

No Mouse installed on the system

	DOS	Windows 3.XX	Windows 95	Windows 98	Windows Me	Windows NT 4.0	Windows 2000	Windows XP
N16B-0558-B230 / B240								
Switch set to Non PnP								
Switch set to PnP			May not work	May not work	May not work			

Some BIOS issues on machines may cause this setting not to function. If so please use Non PnP

Serial mouse installed on the system

	DOS	Windows 3.XX	Windows 95	Windows 98	Windows Me	Windows NT 4.0	Windows 2000	Windows XP
N16B-0558-B230 / B240								
Switch set to Non PnP						Not functional		
Switch set to PnP						Not functional		

There is a considerable amount of information in the readme.txt file that accompanies these new drivers.

Kind regards,

Steve Roylance (B Eng. Hons.)
